TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 212

a-Crystallin; Pb^{2+}; Lens; Cataract **212**, 1

Alcohol; Alcoholic liver cirrhosis; Peripheral blood mononuclear cells (PBMCs); Apoptosis; Zinc supplementation; sFas; sFasL; GSH **212**, 124

Alcoholic liver cirrhosis; Alcohol; Peripheral blood mononuclear cells (PBMCs); Apoptosis; Zinc supplementation; sFas; sFasL; GSH **212**, 124

Allergens; Chemokine receptor; Dendritic cells; Dinitrochlorobenzene (DNCB); Bandrowski's base (BB); Coumarin; Dichloronitrobenzene (DCNB) **212**, 227

Allergic contact dermatitis; Polymorphism; Genetics; Superoxide dismutase; *para*-phenylene diamine **212**, 148

Alternative models; Hypersensitivity; Local lymph node assay (LLNA); Immunotoxicity **212**, 69

Androgen binding protein and lactate; Polychlorinated biphenyls; Sertoli cells; Antioxidant enzymes; Lipid peroxidation **212**, 195

Antioxidant enzymes; Polychlorinated biphenyls; Sertoli cells; Lipid peroxidation; Androgen binding protein and lactate **212**, 195

Antioxidants; Cisplatin; Lycopene; Lipid peroxidation; Histopathology **212**, 116

Apoptosis; Alcohol; Alcoholic liver cirrhosis; Peripheral blood mononuclear cells (PBMCs); Zinc supplementation; sFas; sFasL; GSH **212**, 124

Apoptosis; Environmental toxins; NK cell; Z-VAD-FMK; Valinomycin and caspase-3 **212**, 37

Apoptosis; Podophyllotoxin; Glucoside; HeLa; p53 **212**, 46

Apoptosis; Tenocytes; Fluoroquinolones; Matrix metalloproteinases; Caspase-3 **212**, 24

Atherosclerosis; Endothelial; THP-1; Cytokines; Cigarette smoke **212**, 87

Bandrowski's base (BB); Chemokine receptor; Allergens; Dendritic cells; Dinitrochlorobenzene (DNCB); Coumarin; Dichloronitrobenzene (DCNB) **212**, 227

Behavior; Propylthiouracil; Quantitative RT-PCR; Gene expression; Developmental neurotoxicity **212**, 135

bentazon; Spermatogenesis; Comet assay; micronuclei; synaptonemal complex; sperm morphology; mouse **212**, 165

Biomarkers; Oral iron; Iron reserves; Inflammation; Lipid peroxidation; Cytokines; Hepcidin **212**, 10

Brain; Depleted uranium; Paradoxical sleep; Target organ; Kidneys; Toxicity **212**, 219

Caffeic acid phenethyl ester; Cyclosporine A; Reactive oxygen species; Heart **212**, 155

Carbofuran; Malathion; Ectonucleotidases; NTPDase; Ecto-5′-nucleotidase; Zebrafish **212**, 107

Caspase-3; Apoptosis; Tenocytes; Fluoroquinolones; Matrix metalloproteinases **212**, 24

Cataract; Pb^{2+}; Lens; α-Crystallin **212**, 1

Chemokine receptor; Allergens; Dendritic cells; Dinitrochlorobenzene (DNCB); Bandrowski's base (BB); Coumarin; Dichloronitrobenzene (DCNB) **212**, 227

Cigarette smoke; Atherosclerosis; Endothelial; THP-1; Cytokines **212**, 87

doi:10.1016/S0300-483X(05)00316-1

Cisplatin; Lycopene; Lipid peroxidation; Antioxidants; Histopathology **212**, 116

Cisplatin-mediated DNA interstrand crosslinks and double-strand breaks; Replicating versus quiescent yeast cells; Homologous recombination **212**, 175

Comet assay; Spermatogenesis; bentazon; micronuclei; synaptonemal complex; sperm morphology; mouse **212**, 165

Coumarin; Chemokine receptor; Allergens; Dendritic cells; Dinitrochlorobenzene (DNCB); Bandrowski's base (BB); Dichloronitrobenzene (DCNB) **212**, 227

Cyclosporine A; Caffeic acid phenethyl ester; Reactive oxygen species; Heart **212**, 155

Cyhalothrin; Pyrethroid type II; Insecticides; Macrophage activity; Spreading; Phagocytosis; NO **212**, 98

Cytokines; Atherosclerosis; Endothelial; THP-1; Cigarette smoke **212**, 87

Cytokines; Oral iron; Iron reserves; Inflammation; Lipid peroxidation; Hepcidin; Biomarkers **212**, 10

Dendritic cells; Chemokine receptor; Allergens; Dinitrochlorobenzene (DNCB); Bandrowski's base (BB); Coumarin; Dichloronitrobenzene (DCNB) **212**, 227

Depleted uranium; Brain; Paradoxical sleep; Target organ; Kidneys; Toxicity **212**, 219

Developmental neurotoxicity; Propylthiouracil; Quantitative RT-PCR; Gene expression; Behavior **212**, 135

Dichloronitrobenzene (DCNB); Chemokine receptor; Allergens; Dendritic cells; Dinitrochlorobenzene (DNCB); Bandrowski's base (BB); Coumarin **212**, 227

Dinitrochlorobenzene (DNCB); Chemokine receptor; Allergens; Dendritic cells; Bandrowski's base (BB); Coumarin; Dichloronitrobenzene (DCNB) **212**, 227

Ecto-5′-nucleotidase; Carbofuran; Malathion; Ectonucleotidases; NTPDase; Zebrafish **212**, 107

Ectonucleotidases; Carbofuran; Malathion; NTPDase; Ecto-5′-nucleotidase; Zebrafish **212**, 107

Endothelial; Atherosclerosis; THP-1; Cytokines; Cigarette smoke **212**, 87

Environmental contaminants; World Wide Web; Food toxicology; Internet **212**, 54

Environmental toxins; Apoptosis; NK cell; Z-VAD-FMK; Valinomycin and caspase-3 **212**, 37

Epidermal cells; Rats; Warfarin; Skin; Oxidative stress **212**, 206

Fluoroquinolones; Apoptosis; Tenocytes; Matrix metalloproteinases; Caspase-3 **212**, 24

Food toxicology; World Wide Web; Internet; Environmental contaminants **212**, 54

Gene expression; Propylthiouracil; Quantitative RT-PCR; Behavior; Developmental neurotoxicity **212**, 135

Genetics; Allergic contact dermatitis; Polymorphism; Superoxide dismutase; *para*-phenylene diamine **212**, 148

GLAST; Pb neurotoxicity; GLT-1; Glutamine synthetase; Glutathionylation; Glutamine **212**, 185

GLT-1; Pb neurotoxicity; GLAST; Glutamine synthetase; Glutathionylation; Glutamine **212**, 185

Glucoside; Podophyllotoxin; Apoptosis; HeLa; p53 **212**, 46

Glutamine synthetase; Pb neurotoxicity; GLAST; GLT-1; Glutathionylation; Glutamine **212**, 185

Glutamine; Pb neurotoxicity; GLAST; GLT-1; Glutamine synthetase; Glutathionylation **212**, 185

Glutathionylation; Pb neurotoxicity; GLAST; GLT-1; Glutamine synthetase; Glutamine **212**, 185

GSH; Alcohol; Alcoholic liver cirrhosis; Peripheral blood mononuclear cells (PBMCs); Apoptosis; Zinc supplementation; sFas; sFasL **212**, 124

Heart; Cyclosporine A; Caffeic acid phenethyl ester; Reactive oxygen species **212**, 155

HeLa; Podophyllotoxin; Glucoside; Apoptosis; p53 **212**, 46

Hepcidin; Oral iron; Iron reserves; Inflammation; Lipid peroxidation; Cytokines; Biomarkers **212**, 10

Histopathology; Cisplatin; Lycopene; Lipid peroxidation; Antioxidants **212**, 116

Homologous recombination; Cisplatin-mediated DNA interstrand crosslinks and double-strand breaks; Replicating versus quiescent yeast cells **212**, 175

Hypersensitivity; Local lymph node assay (LLNA); Alternative models; Immunotoxicity **212**, 69

IMDS; Murine local lymph node assay; Modified local lymph node assay; Inter-laboratory catch-up validation **212**, 60

Immunotoxicity; Hypersensitivity; Local lymph node assay (LLNA); Alternative models **212**, 69

Inflammation; Oral iron; Iron reserves; Lipid peroxidation; Cytokines; Hepcidin; Biomarkers **212**, 10

Insecticides; Cyhalothrin; Pyrethroid type II; Macrophage activity; Spreading; Phagocytosis; NO **212**, 98

Inter-laboratory catch-up validation; Murine local lymph node assay; Modified local lymph node assay; IMDS **212**, 60

Internet; World Wide Web; Food toxicology; Environmental contaminants **212**, 54

Iron reserves; Oral iron; Inflammation; Lipid peroxidation; Cytokines; Hepcidin; Biomarkers **212**, 10

Kidneys; Depleted uranium; Brain; Paradoxical sleep; Target organ; Toxicity **212**, 219

Lens; Pb^{2+}; Cataract; α-Crystallin **212**, 1
